

Motor Neurone Disease Association of Tasmania (MNDTas) is a state-wide not for profit organisation governed by a volunteer Board. It does not receive assistance from the government and is funded entirely by the generosity of others. The chart below indicates the origins of the income and highlights the vital role of fundraising within the Association.

Income – Financial Year End 2018

The Association provides the only *MND Advisor Service in the State. It also operates a car/home modifications and equipment assistance scheme as well contributing to MND research. Our services are provided at no cost to the person living with MND. The chart below identifies the allocation of income received.

Operating Expenses - Financial Year End 2018

*The MND Advisor Service is operated on our behalf by MND Victoria through a Memorandum of Understanding. Current for the 2019-2021 period. MND Victoria financially subsidise this service as required. In 2018 MND Tasmania posted a surplus of \$11, 533. This has enabled us to increase the size of the financial commitment we make each year to the MND Advisor Service which has resulted in an increase of the operational hours of this service.
